

February 15, 1963

Hon. Judge Joseph E. Nelson
District Judge, Uintah County
County Courthouse
Provo, Utah

Dear Judge Nelson:

During 1962 we operated three separate distribution systems in the Vernal Area. These systems are administered on the following premise:

1. FOX CREEK: In accordance with the General Determining Proceedings.
2. MUSK CREEK: Pursuant to the order of the court dated May 26, 1959.
3. ASHLEY CREEK: Pursuant to the order of the court dated May 15, 1962.

We feel that we can provide better and more economical service to the water users by combining these systems into one larger operation. We are, therefore, proposing the consolidation of the three creeks into the "Vernal Area Distribution System" and have drafted by-laws under which the water users might operate. Copies of these proposed by-laws and correspondence on this are enclosed for your information. We would continue to administer the separate parts under the same authorities as in 1962.

We hope this procedure meets with your approval and that the water users will agree. Any comments you might have would be appreciated.

Yours truly,

Wayne D. Criddle
STATE ENGINEER

DCH/wb
